

PAUL G. ALLEN PROFESSORSHIP MATCHING GIFT PROGRAM

We are excited to announce the launch of the Paul G. Allen Professorship Matching Gift Program. Paul hoped that members of the Allen School would forever “continue to dream big, breaking through technological barriers and using their skills to solve ... the biggest problems our world faces.” This program is designed to support that goal.

Sustaining Excellence Through Exceptional Faculty

Professorships are critical to advancing our educational and research mission. They provide recognition for exceptional faculty, they serve as a “venture fund” to support new directions in research and education, and they represent enduring tributes to the donors who establish them. As we grow, we must increase investment in recruiting and retaining extraordinary faculty – those who help power our excellence. To that end, we seek private funding for ten new endowed professorships.

Leveraging a Legacy for Profound Impact

Under the Paul G. Allen Professorship Matching Gift Program, your gift will be matched 1:2 with earnings from the Paul G. Allen School Endowed Fund for Excellence – the endowment that Paul created when he established the Allen School. Funded at a combined philanthropic investment of \$1 million – the level currently established for Endowed Professorships in the Paul G. Allen School and the College of Engineering – each new professorship will bear the name you choose, as well as the name of Mr. Allen, the revered “idea man.”

Endowment	Donor Gift	Match Amount	Total Funding
Joe & Jane Sample - Paul G. Allen Endowed Professorship in Computer Science & Engineering	\$667,000	\$333,000	\$1,000,000

(Of course, it is also possible to create an endowed professorship without a match from the Allen Endowment, for a philanthropic investment of \$1 million.)

Ten by TwentyOne

We seek to establish ten new professorships by the end of 2021. The Paul G. Allen Professorship Matching Gift Program is limited in funds and duration; the program will conclude when the matching funds are fully committed or at the end of 2021, whichever comes first.
