## COMPUTER SCIENCE UNDERGRADUATE DEGREE PROGRAM

The University of Washington begins its new undergraduate degree program in computer science with two new courses during the 1975-76 academic year, beginning autumn quarter.

"Programming," catalogued CS (for Computer Science) 241, will be offered this autumn quarter. "Introduction to Computer Science" (CS 201) will be taught in winter quarter 1976.

Approved by the state's Council on Higher Education, the new undergraduate degree program will award its first bachelor of science degrees in June 1978.

"Enrollment will be limited," announced Dr. Jerre D. Noe, chairman and professor of computer science, "but, due to the late announcement of the program, enrollment will be extended until July 1."

Dr. Noe said that selection of applicants will be "primarily based on scholastic achievement and potential." He strongly encouraged women and minority students to apply for the undergraduate degree program.

The Department of Computer Science is a new intercollege department, affiliated with both the College of Arts and Sciences and the College of Engineering. The new department evolved from the Computer Science Group, a graduate interdisciplinary unit offering master of science and doctor of philosophy degree programs since 1967.

Information on how to apply for the major and other details are available by contacting Dr. Alan C. Shaw, computer science undergraduate adviser and associate professor of computer science. Queries should be directed to the Department of Computer Science, FC-10, University of Washington, Seattle 98195, or 206/543-1695.
